

# Magnets

**Magnetism** is a force. You can feel it if you have two magnets like these!

You can't **see** forces, but you can **feel** them!

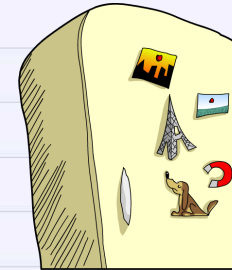

What do you know about the forces of magnets?

All magnets have a north and south pole, but not all are labeled like these.

Think of some everyday uses of magnets.  
Make a list in words and drawings.

1. Used in electrical switches.

2.
